

Installation Instructions

12263

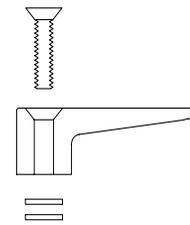

Model 300 & 301 Air Valve

Normally Open (NO)

Normally Closed (NC)

When installing push plate, washers may be necessary to achieve proper operation of interlock. (P/N 301)

1. A suitable thread sealant is required. Allow for recommended setup time prior to testing
2. Use Anti-Seize compound on mounting bolt thread prior to installation
3. Always install an air fitting with a 4" (inch) minimum section of air line in the exhaust port of the valve. Position section of air line down to prevent moisture from entering the valve
4. Actuation requirements: Adjust button wheel in or out to achieve 1/4" min to 9/16" max stroke
